Northern CLASSIC

CHAROLAIS + SIMMENTAL BULL SALE

Welcome to the 17th Northern Classic Sale

Welcome to the 17th Annual Northern Classic Bull sale. As we enter another bull sale its really hard to believe a year has come and gone so quickly. 2019 was a year for the record books with lots of rain in the Peace Country. Haying, silaging and the grain harvest was a real struggle to get done with lots of crop still left in the field awaiting harvest in the spring. 2019 the cattle markets remained strong for the most part with some up and downs. One thing for sure is the market really had a demand for exotic cross calves which were bringing a premium especially on the bigger calves. The importance of performance in our calves remains strong while maintaining calving ease and maternal traits to get us there. Alberta continues to be a leader in the beef industry with its products being some of the most sought after world wide.

Both programs have stayed very committed to the cattle industry, always searching for new genetics to advance our programs to the next level through purchasing top end walking bulls or buying semen packs from some of the most sought after genetics in the cattle industry. We are constantly working on putting the best possible cow herd together to raise the best possible set of bulls for you, our customers. Both programs are family based operations where everyone is involved in the farm and fill important roles.

We continue to offer the payment plan with half down sale day and the other half due November 1st 2020. We continue to offer free delivery in the Peace region and do our utmost to get them delivered right to your farm. We continue to offer sight unseen purchases and work very closely with you to find a bull that will meet your needs. Both farms guarantee our bulls so if a problem arises with your purchase, please contact us immediately so we can work with you to solve the problem. If you are not happy then neither are we.

This years bull pen is the strongest set we have brought to town yet. Breed leading genetics obtained by using exclusive semen packs, top end walking herd bulls and extensive embryo work that will be the first to be offered in the Peace Country. This year we have on offer Full Flecks, Fullbloods, Red and Black Simmental bulls along with a group of Charolais bulls.

Jaydawn Farms & Willow Creek Simmentals

Welcome from Bohrsen Marketing Services

On behalf of Bohrsen Marketing, we would like to welcome you to the Northern Classic Bull Sale. It's with great honour that we are asked to assist with this powerhouse bull sale that annually offers the very elite of the Simmental and Charlais breeds. Both Darryl and Taylor had the privilege to tour and analyze these great bull pens in mid-February and they were equally impressed.

When going through the JayDawn bulls, you have to appreciate the consistency and no nonsense approach to each of their breeding programs. There is a wide selection of bulls to choose from if your looking for that next calving ease sire, or your next power bull. The emphasis on cow power is evident as JayDawn as they're a fairly closed herd that annually retains their elite females, which in turn offers you an outstanding set of bulls yearly.

Willow Creek Simmentals are passionate about the Simmental breed and have a strong, select, highly productive cowherd. They annually bring a sought after set of bulls that are targeted towards excelling for their customers and this has resulted in a strong reputation. This years set of bulls are as deep as ever and will be sure to impress with quality and consistency.

These great folks are some of the very best to work with and source your next herd bull from. We look forward to visiting with you before the sale they know the bulls better than anyone. If you are unable to attend this sale please don't hesitate to contact the consignors or Darryl to find that right herd sire for you. Hope to see you at the Evergreen Park on sale day!

The Bohrsen Marketing Team

Welcome from Bouchard International

Welcome to the 2020 edition of the Northern Classic Bull Sale. Both Jaydawn and Willow Creek are committed to bring you bulls that will supply your herdsire needs. The consignors have gained a reputation for the development of the bulls on offer, bulls that are adequately developed yet not over fed. The bulls on offer are in breeding condition, ready to go out and work for you. Jaydawn and Willow Creek put a lot of effort and planning into the selection of the genetics they use in their AI programs.

The walking herd bulls used are bulls with proven pedigrees and data to fill the genetic needs of you, the producer. I encourage you to call the McQuaig's and Klassen's prior to the sale to discuss your herd bull needs. They will be happy to spend the time with you to discuss your requirements for the 2020 breeding season.

Plan to be with us in Grande Prairie to evaluate a set of bulls that are developed with a feeding and nutritional program to last. I look forward to visiting with you sale day. I will have evaluated the bulls prior to sale day, if I can be of assistance please feel free to give me a call. If you are unable to attend the sale give me or any of the capable sales crew a call.

INSURANCE

Stockmen's Insurance
Cassie Dorran 403.507.5953
Bulls that return to the farm must carry insurance.

PAYMENT TERMS

Pay 1/2 on sale day and the balance is due on November 1st with postdated cheque. Bulls become the risk of the purchaser as soon as they are sold and must carry insurance to qualify for Terms. All bulls must have their registration papers transferred to same owner.

HEALTH & FERTILITY

All bulls will be scrotal measured and vet examined. All bulls over 12 months of age will be semen tested. All bulls were treated with Ivomec and such products and have received all of their vaccinations. Contact seller for details on programs.

100% GUARANTEE

All bulls are guaranteed to be satisfactory breeders in accordance with CSA and CCA guidelines. Should a problem occur barring injury or mismanagement, a bull of equal value will be provided or a credit will be issued towards the purchase of another bull. We guarantee you will have a bull to service your cows.

HEATED SALES BARN

Attend the Northern Classic and take advantage of the sale, the 4-H show and all the festivities involved with the trade show. Remember to show your catalogue at the gate in order to park next to the Drysdale Centre.

TERMS & CONDITIONS

Cattle will sell under the standard Bouchard Livestock Terms and Conditions posted on the inside back cover of this catalogue.

HEIFER APPROVED

Throughout the catalogue you will see bulls pointed out as individuals that could be used on heifers with minimal or no calving troubles.

IN-HERD USE SEMEN RIGHTS

We reserve the right to collect semen on any bull in the sale for in-herd use only. If you have any questions please contact us.

MULTIPLE PURCHASE DISCOUNT

Volume discounts on three bulls purchased from JayDawn Farms or Willow Creek Simmentals triggers a 5% discount. Must be three bulls from one farm to trigger this discount.

BULL DEVELOPMENT OPTION

The Northern Classic consignors will keep the bulls free of charge until the early part of April. Bull buyers need to insure the bulls while cared for by the consignor.

DELIVERY - OPTION A

Bulls can be picked up at Evergreen Park on sale day and a \$100 discount will be deducted from purchased price.

DELIVERY - OPTION B

At the buyers option and risk the bull can return home and be delivered anywhere in the Peace Region and to central locations free of charge. Anywhere outside of this will be shared costs of the buyer and seller. We will do our utmost to deliver them right to your yard. We will start delivery shortly after the date of the sale on our schedule so please have a spot ready for your bull as we try to make full trailer loads when delivering.

DELIVERY - OPTION C

Bulls can return to JayDawn or Willow Creek and be picked up at any time prior to April 1 at the buyer's convenience.

SIGHT UNSEEN PURCHASE PROGRAM

We still offer the personal touch given, as when our bulls were sold on the farm. Contact us and we will personally go over the bulls, your program and your needs. If you are not able to attend the sale, we will recommend you to contact one of the sales staff, who will represent your needs in a professional and confidential manner.

EPD EXPLANATION

EPDs are "Expected Progeny Differences". They are a useful tool in selection. EPD incorporate the individual animal with it's ancestry performance. EPDs do not compare across cattle breeds. They are individual based per breed. EPDs indicate a probable variance above or below breed average for that trait for a given bull's progeny. The accuracy of EPDs for calendar year bull calves is generally about 20% (one out of five times) so use it cautiously. One of several selection tools.

Purebred Sales • Daily Presort Sales
Direct Off-farm Sales every Thursdays at 10:00 am

Welcome from JayDawn Farms

On behalf of the crew at JayDawn Farms I would like to Welcome you to the 17th Annual Northern Classic bull sale which will be held at Evergreen Park in the Drysdale building on Friday March 13th at 1 pm. Please come join us for lunch prior to the sale at noon, attend the sale and stick around for some hospitality after the sale.

The Older I get it seems that time becomes more precious and life gets busier making it tougher to get everything done. This last year has been a complete blur and its really hard to believe we are prepping for our 17th annual bull sale. 2019 was definitely a year to remember being busy both with the farm and the family. A very wet summer made haying, silaging and grain harvesting very challenging for everyone across the Peace Country and we were no different with having still 700 plus acres of crop to deal with in the spring. With that said the agriculture industry and especially cattle producers seem to be resilient and will tough it through and make the best of it. The highlight of the year for JayDawn was a wedding in Mexico where our oldest son Jordan and Brittney got married. Long overdue holiday for the family which was enjoyed by all the family and some real close friends.

For those that we have not met JayDawn is a family based operation located in Teepee Creek, located North East of Grande Prairie. The farm was started by my parents Don & Patsy, mom still lives on the farm and spoils us with cooking dinners whenever she can. Our kids Jordan, Kris and Darcie help out when they can and we really appreciate the help. We have two grandchildren Wyatt and Rylee who bring us lots of laughs and really make us realize how important family really is.

We run a mixed cattle grain operation with our main focus on the cattle. We run a purebred herd along with some commercial cows that we use as receipts in our embryo program. We are calving out 235 cows plus 35 custom cows this year, with the plans to breed about 300 of our own females this spring. We use extensive ai for 30 days before turning out the herdbulls. The cow herd is on a strict program which we cull heavy for udders, feet, fertility and nature. Our cows and heifers are expected to calve easy and bring in big calves in the fall. Our program consists of Fullbloods, Full Fleckvieh, Red & Black Simmentals, Charolais and a group of commercial cows. We are always on the hunt for new genetics and spare no expense when purchasing new genetics whether It's through semen for ai or walking herdsires.

We really appreciate and would like to thank everyone who has supported our program over the years and look forward to continuing business with you. We look forward to meeting new customers as well. We are very committed to the cattle operation. We know that everything we do will sometimes not work out and we just need to cut our losses no matter what. We strive to raise the best product possible both purebred and commercial and are very proud of what we do here at JayDawn. If you have any troubles with a purchase from JayDawn Farms contact me immediately and we will get the problem resolved. Our motto is simple "If you are not happy then neither are we!" We look forward to working with our past customers and meeting new ones as well. If you have any questions about our program call or stop in anytime the coffee is always on and we will gladly discuss our program with you.

Full Brothers. Here is a pair of powerhouse sons of the great Pepsi cow definitely deserve to lead of this years sale. Moderate birth weights with explosive performance in a pedigree that is bred to be great. These embryo bulls are very long and stout made with a ton of hair. Big testicles with excellent feet and a very quiet dispositions. Their pedigree is stacked with the who's who in the simmental breed. Their dam JDF Pepsi 61U has been a no miss female and cranks out the good ones no matter who she's bred to. She has been successfully flushed over the years. A lot of the simmental breed stems back to this great donor cow when you start looking thru the pedigrees. The sire is no other than Captain Scream a bull that no doubt created a ton of excitement within the breed. His semen is very sought after and hard to come by. I think the best of Captain Scream is yet to come as the daughters come into their peak production years. This pair of bulls are backed by a pedigree that is tried tested and true... don't miss out on these bulls as they are true herdsires in the making.

Another embryo bull that stands right at the top of the pen. Very moderate, stout made with an excellent disposition best describes 1G. This black baldy bull has been a pen favorite all year. He is the second flush that we did on the 16X cow who has been a real top producer for us hence why she is in the donor pen. The first flush to Westcott was very successful with producing both top end bulls and females. Her second flush to Missile just proved to us that no matter what this cow is mated to she cranks out the good ones. We have three full sisters to 1G in the keeper pen with a flush mate selling last Decembers to Perkins Land and Cattle at Checkers. 16X has perfect feet, a real nice udder and a disposition that is second to none. This baldy bull will work on a variety of programs, if your looking to keep females then look to 1G.

Maternal Sister :: JDF Annie 834F

lot 3

JDF *Missile* 1G

1292063 // JDF 1G // January 3, 2019 // Multi Polled // Multi Black

In 2018 we flushed all 3 of our donor cows to MRL Missile as he is one of the top ai sires on the market who produces both top end bulls and females. The mating to the Rebecca 502R proved just that giving us heifer calves that one would want a whole pen of and gave us only one bull which we are very happy with. 19G is as smooth made as one can make him with a very nice front end yet is stout and deep sided. He is very correct made and gets out and moves very freely. The 502R cow is 15 this spring, never had her feet touched, never had to help a calf suck and has an excellent up tight udder for a cow her age. She has been in the donor pen with matings to Red Mountain, Westcott and Missile. No matter what she is bred to she produces both top end bulls and females.

Here is a direct son of Missile and another one of our donor cows that knows how to crank out the good ones. 17x is known as the bull producer here at JayDawn, a pedigree that we wanted to expand on so we flushed her to Missile. Zenyetta is a big powerhouse female with excellent feet and an excellent udder and her production records are superior. 3 of her most notable sons have sold to the excellent commercial programs of Paul & Lori Kinnee and Duane Kinnee. We are very excited with the results in this flush giving us 2 bulls and 3 heifers born in 2019 with more on the ground in 2020. They are born easy and grow rapidly just as all her offspring do. Another bull from the 2019 calf crop was at the top of the pen but got hurt just prior to cataloging, 2 black heifers are at the top of the replacement pen with the 3rd stout red heifer selling to excellent operation Albrecht Farms down at Checkers Sale last December. 9G is very smooth made and gets out and travels very freely on excellent feet and legs. He is stout made with lots of depth throughout, he will work is just about any type of program.

23G is a performance black bull out of one of our best cows, she is a bull making machine. Her calves are always born easy and have a ton of performance to them and always end up on the top end of the pen. The Red Doll cow family have excellent udders and feet and are big volume cows. We really should be flushing 153y as she is getting up there in age. She has had all bull calves to date with sons selling to some of the best commercial herds in Western Canada. Dan & Kerry Lange 2014, Darren Priest & Darren Hannis 2017, David Ziemmer 2018 and Nicklason Stock Farms in 2019. This Missile son is also at the top of the pen and will be easy to find on sale day.

We only have two direct sons of LFE Riddler this year on offer. 7G is a real long made Riddler son that has a ton of performance to him. Very stout made and has lots of thickness when you get in behind him. His dam 425B stems back to one of our favorite cow families the Bobby Sox cow family. Moderate made cows with excellent feet and are very easy doing females. They have excellent udders with a ton of milk and gentle dispositions. A full brother sold to the good commercial program of Ray Unrah of Nampa last year. This cow family knows how to produce with the dam Bobby Sox 70X still in production and a daughter with one of our best calving ease bulls on offer JDF 40G. There is no guess work in this pedigree.

Sire :: LFE The Riddler 323B

lot 7

JDF *Riddler* 7G

1292046 // JDF 7G // January 8, 2019 // Double Polled // Multi Black

If you are looking for a performance bull to increase frame and length in your calves then look to 53G. Here is one of the longest smooth made bulls in the whole offering, 53G is a Riddler grandson that is stacked with maternal power on both sides of the pedigree. His sire 110D was sold to the excellent program of Al Landaker in the 2017 sale as one of the high sellers. We retained a share in 110D to use as cleanup bull mainly because of the Red Doll cow family and the performance in this pedigree. A cow family that has been some of our top producers year after year bringing in our best calves both male and female. 53G's Dam is a big beautiful black baldy cow that has perfect udder with a ton of milk. She is out of the PRL Unlimited bull that left us with tremendous females. 110D left us with a solid set of bulls in the pen and we are very excited about the heifer calves in the replacement pen. 53G will be easy to find on sale day. He will produce big soggy steers that will top the market and replacements you can't get enough of.

Here is a moderate made Riddler son that is very deep sided and long made. He has a ton of hair and has excellent feet and legs. He is out of 556C a cow that is a direct daughter of the great Pepsi cow and the female maker Powerline. 556C is a smaller made cow that is big on production. She is a full sister to the VooDoo bull that we walked with great success. This pedigree is stacked on both sides of trouble free cow families.

The mating between Brooks and Wallbanger really clicks for us. 35G is a full brother to 32F who sold to the excellent commercial program of Ed Yuha in last years sale. Much like his brother 35G is super long and smooth made. Super nice fronted this bull will calve super easy. His dam 216Z is just a good honest cow that really can produce. She has a good udder with lots of milk and really good feet. She gave us a Brooks heifer this year that will be sure to be at the top of the replacement pen.

13G has been a pen favorite right from birth. His dark red cherry color and big wrap around goggles grab your attention. He is super long smooth made, deep sided and is stout when you get behind him. His dam is a direct Rocket female a sire that is known for his excellent females ranking very high in all the maternal traits . Good feet, good udders, excellent productivity and longevity lines his pedigree. His sire Budha a bull we bought from Czech-mate was very stout made with a ton of middle and backed by the Soda Pop cow family who is also very maternal. 13G will give you a tremendous set of steers and replacements you can't get enough of. This bull will work in a variety of programs.

Another March born Budha son, super deep sided and stout made. This Budha son is deep red in color and gets better and better as he matures. He is very docile and was one of those bulls in the picture pen that would not lift his head. His dam is a young Astute cow that has a perfect udder and is backed by a very strong cow family. This bull will work on a variety of programs

76G has been a pen and pasture favorite all year. This black baldy bull always catches your eye when you enter the pen. He will lead off the last set of VooDoo bulls that will be sold as we lost VooDoo in the fall of 2018. VooDoo himself was a big long made bull that had excellent feet under him, he calved really good and his offspring grew very rapid. The daughters have excellent udders and are going to rise to the top very quickly. 76G is very similar to his full brother that sold to an excellent commercial operation up at Keg River last year to Kelly Broadhead. He is super long and smooth made with excellent feet under him. His dam is a Buckeye daughter that has a perfect udder that stems back to the Frosty cow family that worked so well for KimLake. This bull will give you trouble free calving with calves that will grow excellent.

Here is the youngest bull on offer, this mid March born bull was too good to leave at home. If you breed your cows a little later this just might be the sleeper in the sale to watch for. He has always caught our eye right from birth. Typical VooDoo son very long and smooth made, he is made right and has a ton of hair. His dam is from the Fortune cow family, cow family known for extra production, excellent udders and feet. Take a real good look at this bull the more you analyze him the more you will like him.

Here is a true herdbull in the making, he has been a farm favorite right from birth. This Night Hawk son was born unassisted at 88 lbs and never looked back. We used Night Hawk as the goto calving ease bull and it worked extremely well for us in the heifer pen. Never had to help any of the heifers to calve. 40G is stout made and is very deep sided. He has lots of testicles under him and is really good footed. He has that herdbull look to him when he gets out and moves. He has a ton of hair and is backed by one of the strongest cow families on the farm. Dam, Grand Dam and Great Grand Dam all are excellent footed and all have excellent udders. This just maybe the next calving ease bull that you were looking for.

Another heifer bull we have used with great success in our heifer pen is the Rampage bull. His semen is now no longer available which we were very disappointed about. Not only did Rampage work so well in the heifer pen he left us with some awesome females. The females are moderate and stout made with awesome udders and are great mother cows. 54G is out of another Riddler female and really produced on her first go. The Mattie cow family have really nice udders with perfect teat size. 54G has a real nice small head on him and is super long and smooth made. These Rampage bulls are very moderate and stout when you get in behind them. If you want calves that are born super easy and grow excellent with leaving awesome replacement females then look to one of these Rampage sons.

Probably the stoutest made Rampage bull that has the most muscle expression of all the sons. Again very long made on a moderate frame. He also has a real nice head and front end for calving ease. His dam 707E has a very bright future ahead of her at JayDawn. Beautiful Riddler daughter with a perfect udder, we are really pleased with the Udders on our Riddler females. 707E is moderate made and has lots of body to her with excellent feet under her. If I was looking for a bull for calving ease or to calve on the grass I would be looking to these Rampage sons. Calves are born small, get up quick and really grow.

89G has all the makings of a true calving ease bull. Real small headed, real nice fronted and super smooth. He is smaller in frame structure and bone. The Odins have worked super well for us in the heifer pen with his sire used as cleanup behind our ai for the last three years. 115C calved super good for us calving unassisted on our first calvers. 115C is backed by a real good cow family to give some maternal to the pedigree, the Odin females are smaller made but big on production. If calving ease is what you are looking for then look to 89G.

This is our only Fullblood on offer this year and he is a calving ease bull that has ton of calving ease bulls in his pedigree, Blue Print, Imax, Radium and Bravo. 18G is very moderate frame with smaller bone to him with a nice small head. He is very smooth made yet has some muscle shape to him. Backed by a very maternal cow family, this bull ranks in the top 10% for milk and maternal calving and within the top 5% for calving ease. He will give you peace of mind at calving and daughters you will want to retain in the herd.

IPU *Bentley* 81F

It was a very exciting day when we stepped up to the plate and purchased IPU Bentley from Labatte Simmentals for \$92,000. This black baldy bull was highly sought after and we are very fortunate to have landed him at JayDawn. He is super soggy and soft made, he gets out and travels so freely and has a gentle disposition. We feel that he will take our program to the next level. We have a real good sample of calves on the ground with both the heifers and the bull calves looking superior. Birth weights are right where they need to be with most between 85 -100 lbs all unassisted. Calves get up quickly and rapidly growing with exceptional hair coats. He is stamping quite a few with a real nice blaze with both black and red calves on the ground. Reports from other breeders who bought semen packs last spring are coming in with all positive feedback. This black baldy caught the eye of many astute cattle breeders across North America and we are very thankful for the support in the number of people who purchased semen packs last spring and then again at Agribition where his semen averaged 330 a dose.

Thanks to these Progressive Breeders who bought semen Packs

26G Deserves to lead of this year Charolais division at our sale. He has been a standout right from birth. He is very stout made and packed right full of muscle and red meat. Long made with a real wide top to him. He has a ton of hair and good feet under him. The Downtown calves have extra performance to them and really perform. 26G's dam was purchased out of the SanDan herd, she is a bull maker. She is a large volume cow with a really excellent udder and feet under her. The buckskin calves top the market, if you are looking to add some pounds to your calves then look to 26G.

This page is all calving ease bulls, 25G has calving ease built right into both sides of the pedigree. All State, Lanza both bulls that calve super easy and have performed very well for us at JayDawn. This bull is out of a first calving Fairytale x Lanza female a pedigree that has worked so well for us. Study his numbers pretty exceptional for a calving ease bull. This bull speaks for himself and will be easy to find sale day.

Committed to Our Customers

The Northern Classic Bull Sale group has offered the following for all the sales that we have hosted, and we continue them for our 17th Anniversary Sale in 2020!

PAYMENT PLAN

Half down sale day, the other half isn't due until November 1, 2020.

MULTIPLE PURCHASE DISCOUNT

Volume discounts on three bulls purchased from JayDawn Farms or Willow Creek Simmentals triggers a 5% discount. Must be three bulls from one farm to trigger this discount.

FREE DELIVERY

We offer free delivery in the Peace Region. For other areas, we work with you at a shared cost to get the bull closest to your doorstep as possible.

SIGHT UNSEEN PURCHASE PROGRAM

Call to discuss your bull needs and to find a bull to fit your program with satisfaction guaranteed.

TRADE SHOW

Enjoy the Peace County Agri Trade Show

Welcome from Willow Creek Simmentals

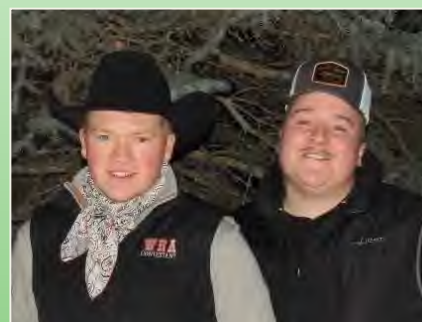

First and foremost we want to welcome you to the 17th annual Northern Classic bull sale. We have really enjoyed the past 11yrs working along side the McQuaig family with the Northern Classic. Its no secret that 2019 has been one of the most challenging years to date. It started with the month long cold snap in February and shifted to non stop rain most the summer and right onto fall. We know that a lot of you, our customers, along with many friends and neighbors still have a good portion of the crops out in the field and under snow. But if theres one thing that stayed strong through it all, it was the cattle. With all the rain this summer it made for great pastures and hay crops. We especially noticed it when we were able to leave cows out grazing this fall for an extra 25 days compared to normal. Along with all the grass meant fat cows which also meant heavier weaning weights this fall.

This years bull pen we feel is the strongest to date as we think we have put together a pen of extremely consistent, long, stout made bulls that will really add pounds to there new owners calf crops. This was our heaviest weaning pen of bulls to date averaging over 900lbs in mid September. It was quite evident this fall that the heavy weight steers really put more money in the ranchers pocket. We feel we have assembled a group of bulls that are as sound footed and structurally correct as we have ever produced. We put a lot of emphasis on our momma cows where we have strict criteria on udder structure and feet. We were really humbled by the comments we received this summer about our cow herd as we hosted the PCBC AGM and field tour. This years group of bulls, like the past have been developed on the Country Junction bull pellet that is a starch free based pellet promoting the development and longevity of these bulls. They have also been fed a haylage based feed and are wintered in a 5 acre field so that the bulls have lots of excersise and really have to get out and move. We take great pride when we tour customers fields and see bulls still walking at 8-10yrs of age.

We remain committed to you our customers, by bringing our very best to town and are constantly on the search for new and improved genetics to move our program forward. With an extensive Ai and embryo program we feel we offer a diverse gene pool that Maintains a focus on feet and udder structure on the cows. Calving ease and performance to produce calves that push the scales down. Like last year we have a large group of Spring Creek Lotto sons that we feel is as strong of a sire group as we have produced. We calved out 15 Lotto daughters this spring and they have PERFECT udders and all have strong calves at side. If you are in the area we invite you out to view them as were extremely proud of them. This year we also added LFE Amber Jack to our AI group to bring a different twist in the red pedigrees. He sired a strong set of low birthweight, high performing bulls that are dark red, long and stout made. Then we have past sires like Red Whiskey, Missile, and Absolute that continue to sire strong calves year after year. If you are ever in the Debolt area we invite you to stop by and tour the bulls along with there mothers. If you have any questions at all don't hesitate to call or text Colby or Mike.

We Hope to see you March 13 at Evergreen Park in Grande Prairie

Willow Creek Simmentals

WILLOW CREEK
THE KLASSEN FAMILY
Simmentals

Lisa 161X was purchased out of the Spring Creek production sale a few years back for \$11,000. She was the 3rd lead off cow in the impressive first group of Liner 56U cows. We wanted to incorporate some Liner 56U into our program and when we found 161X we were excited. Before coming to Willow Creek she raised at \$40,000 Lotto son going to EDN Simmentals. Since coming here her production record has kept up to par. We have a beautiful first calving daughter that has an absolutely perfect udder. She was then flushed the following spring to LFE Amber Jack which produced 12 embryos. These three sons we feel are a perfect example of what kind of production she can do. We also have a flushmate sister and a Lotto sister in the replacement pen as well as two black sons for next years sale, one Lotto and another Amber Jack who are both among the best calves in this years crop. Lisa 161X was worth the money and it sure shows her consistency in production here!

It definitely doesn't take long to point out Spectrum when you want into the bull pen. Quite possibly the longest spined bulls we have every seen. Spectrum is a bull we admire a lot, his cherry red color really adds to the package but we love the larger frame size and over all muscle shape he provides along with the big square feet. This is a bull we really admire the size and structure of his foot. He also boasts a super thick, wavy haircoat and huge testicle development. His dam came to us as one of the lead off cows out of the Spring Creek female sale where we purchased her for \$11,000 and has been worth the money. Spectrum is the lead son of this impressive flush to Amber Jack. Lisa 161X is a big bodied, excellent footed daughter of the great Liner 56U who has become known as maybe the best female producing sire in the entire breed. We feel Spectrum has a lot to offer to the cattle industry. We all know length = pounds and he really displays that with his 965lbs WW mid September. Serious cattlemen have a look here. Without a doubt the stoutest bull in the pen! The amount of style and muscle mass that Jacked Up exemplifies is truly impressive. These flushmates have been pen favorites right from day 1 and it has continued right throughout there life. Like the rest of this flush the foot structure on this bull is exactly what we strive for. We really admire this bull a lot and he made a lot of friends at the Peace Country beef congress where he, and his brother Spectrum 68G were part of the Champion pen of 3 bulls which really speaks to the consistency of this flush. Judge Mike Panasiuk of Springside Charlois really praised the overall thickness, structural soundness and large testicles on the group. Like his brothers, Jacked Up we feel will continue to be crowd favorite come sale day. Homo Polled by Parentage.

This guy comes as the smaller bull of the powerful flush by 161X and Amber Jack. Amber Jack has really added that dark red color, along with massive muscle shape to all his calves. Although Amber Ale is a bit smaller then his flushmates be sure to not look him over. He ended up with the weakest recip of the group so its not really his fault but the genetic package is there. Large testicled, huge hipped and again that ideal structural soundness that the entire flush proves. I feel repetitive but we really cant stress how impressed we are with this flush. Red Whiskey has without a doubt been the best red sire we have ever used and I think that anyone who has attended the sale in years past can agree as he has produced more high seller then any bull we've used. Although Dark Whiskey is the lone Whiskey son this year I think he'd compete with the best we've offered to date. Like many brothers in the past he has long spined, real deep right back through his flank and stout made. The deep cherry red color and bald face really makes him that more attractive. His dam is a heavy fullblood influenced cow that has as good of an udder as any cow on our farm. She is a real model cow here who is just starting her production and I think the future is very bright for her. The third member of the ever so consistent Pen of 3 Champion bulls at the PCBC. With the amount of length and thickness this bull packs in he will sire steers that crush the scale down, yet make females that make the neighbors drool.

Dam :: MMWK Squeak 126D

A feature Lotto son that is a real personal favorite. We may be slightly biased to him as his full sister we feel was one of the most complete females ever produced here at Willow Creek. She was a feature and high seller at the 25th annual Checkers sale where she brought \$12,000 to First Class Cattle where she will enter there donor lineup this spring. She is back here at Willow Creek and we truly invite anyone out to view her as she is a model female already with an absolutely perfect udder. I guess its no surprise that 38G is as good as he is as the power runs in this genetics and hes gonna be a big time herdsire for one lucky cattleman. When we say keep every daughter of his, we truly meant it as these Lotto daughters are simply the best weve ever had. 38G himself is a massive ribbed, long made bull with a ton of muscle shape. He displays a lot of style and smoothness through his front 1/3. If your business is selling females then I highly recommend making the trek to Grande Prairie March 13.

One of the powerful red Lotto sons coming out of two black parents. A real meat and potatoes type of bulls that's chalked full of muscle shape. We cannot say enough good things about what Lotto has done for our program. Lotto has added a ton of consistency to our program. You know you are gonna get a moderate framed, soggy made calf that's heavy muscled and extremely sound on there feet and legs. His dam Roxy 1B is a beautiful cow with a near perfect udder, meaning this guy will be a udder improver for sure. 1B has sent son to Tom Salmond, Herman Geisbrecht and West Hotchkiss Farms.

One of the larger framed red Lotto sons to sell and a bull that is backed by one of the very best black cows here. His maternal brother was a high seller a few years ago to our good neighbor and customer Lee Stevenson. While getting bulls ready we couldn't help but notice the foot size and structure on this bull, something Lotto himself had right up till he died at the age of 8. We have a full sister to 406G that is one of our favorite young cows with a perfect udder. Look for him to add some size and length to his calves and improve the udders on his daughters.

If your looking to add some frame and length to your calf crop then consider 256G. The production record of his dam is simply impressive with 2 sons to Paul and Lori Kinnee, 2 to Scarlett Livestock, and others to Warkentin Bros, Ridgevalley Colony, Darryl Klassen, and Dallas Frank. Just going by the list of top cattlemen there you know the quality she produces. 256G is a bit younger and old 256U has dipped in milk production after we had to take her eye out 2 years ago but the genetic package is still here. Just look up her sons, in her prime she was a consistent 1000lbs producer on September 1. He may not be as big and stout as some other bulls in the sale but the genetics are there to be great.

One of the highest performing Lotto sons to date here at Willow Creek. When we pictured it was quite obvious at the added size this bull brings to the table. Hes a big frame, incredibly long and massive hipped in a cool baldy package. Big Rig is exactly that, big in every way. His dam is a beautiful dark red heavy fullblood influenced cow that many visitors pick out. She has sent sons to Scarlett Livestock, Birch Meadows Colony and two full sibs to Ruttan Land and Cattle, and Nine Mile Ranch. Big time performance bull that will sire impressive females along with big steers.

Full Sibling

You wont find many cherry red two year old bulls for sale in the Peace Country this spring. Due to his age he was held back last spring specifically to be featured this year as a 2 yr old. Even at his young age he was picked out last spring by many top producers who toured the bull pen. It may start sounding repetitive but the females this Lotto son will produce will be ones to build a herd around. His dam was Colby's top pick when he selected a group of bred heifers right from the top of the Maxwell Simmentals herd. A maternal sister to 24F raised last years feature calving ease sire going to Beechinor Bros Simmentals and John has some high praise for him already. Other sisters are some of the feature cows in Colbys herd. This guy will service a big group of cows for his new owner and added value when you need 2yr old bulls to run in the grazing leases. Don't pass up a 2yr old of this quality.

We only have 1 red calving ease bull but he sure is a cool one. WFL Absolute is a bull we've had extremely good luck with in the heifer pen as they come with zero issues and grow to be a good calf. This dark red bull is very smooth in his makeup, moderate framed and has a real presence to him. He is backed by a really nice Red Whiskey first calver that really did a good job on him. She is backed by a solid cow family that has produced Corporal, a bull we kept and used on our own heifers (he left a really nice set of females here), and also we just sold a awesome full sister to 79G dam at Checkers to OKAY Farms at Red Deer. Buy this bull with confidence that you can sleep at night while your heifers calve.

Another powerful Absolute son that really pushes the scales down. Both at weaning and yearling this bull has really pushed the scales down for a calving ease bull. A mere 83lbs bw then exploding to a 910lbs weaning weight in mid September is simply impressive and all anyone can ask for in a calving ease bull. Backed by a beautiful uddered, bigger framed young cow that has really proved to be a producer just by her first try.

Dam :: MRL Miss 3420A

This Lotto son is bigger framed bull that comes with a lot of length and stoutness and the typical thick Lotto hair. You will notice that 420G comes with quite a large birthweight but don't let that hinder your opinion on this bull. He was born 11 day over due, and came out as along as a freight train. We have noticed a lot of Lotto calves come out with a bit more birthweight but they are born so long and are made right that we very rarely ever help one. We all know at weaning that length= pounds and same goes for the birthweight. He is backed by the ever so impressive 420A donor cow that's sure been making a name for herself with her early production. Her first daughter sold for \$20,000 to Gibbons Farms. Her flush to Captain Morgan has been impressive to say the least. Back to back Grand Champion heifers at the PCBC, a powerful female at Maxwell Simmentals and 2 stout bull calves on the ground now that are impressive already. This bull will without a doubt be a udder improver. Some lucky rancher will get a heck of a bull at a discount solely based on his birthweight, I encourage you to look past it for what he really is as I don't expect him to have any calving issues.

Definitely a bull that's gonna have a lot of circles and check marks by him in the catalog at the sale. Loto Max is a moderate made bull that just really has the herd bull look to him. He is super hairy with a really nice square foot that translates into his very correct leg structure. The muscle expression he has is impressive to go along with his soggy rib shape. This is a bull we have been very high on since an early age. His dam has been a herdbull producer with sons at Eldred Ratzlaffs, Landaker Charlois and Fern Ochrans. She is a bigger made Stubby daughter that has great feet and great udder suspension. This is definitely her best son to date and he is a dandy. If your in the market for one of the better Loto sons we've produced to date have a look here, hes worth the trip to Grande Prairie.

If you like to invest in great producing cow family's, then this is your guy. Old 26U has produced many great females here. If you go look up the Missile 62G bull you will see was the highest weaning bull at 1035 lbs, his full brother was last years heaviest weaning bull as well that sold to Warkentin Bros. Both them bulls are out of a maternal sister to 26G. One of our best first calvers is also a maternal sister to him as well. When you add in Loto to the 26U got a highly maternal bull that will sire some big time females. With the maternal side being impressive its tough not to notice the shear power in 26G. He has the added frame and length that shows why he has that big weaning weight. Structurally sound and thick butted make this bull rank very high on our list. His picture definately doesn't do him any justice, he's one of our very best blacks this year.

Really take note of the birthdate on this awesome lotto son. Just a march born birthday but he has really kept up with the rest as he weaned off at 855lbs at 7.5 months old. One of the best haired, longer made bulls in the pen that has a different twist to his pedigree as his dam is off our former walking fullblood bull, Element who now resides at Todd Donaldsons. His dam has a flawless udder and is backed by a solid cow family as her maternal sister has been a big time producer for Beechinor Bros raising many high selling bulls through there sale. This is a bull that will without a doubt be an udder improver and sire some highly productive females. I know it sounds so repetitive but these Lotto daughters we have are truly some of the best females we have ever had. We invite anyone to come see them at the farm, were pretty proud of them.

I really do think Kyle said it best when we were picturing bulls," hes a man among boys in here." We think it couldn't be more true. Unquestionably the highest performing bull ever produced at Willow Creek. He crushed the scale down to 1020lbs at just 8 months old at weaning and then again at 1430lbs at only 10.5 months old at yearling weights. Big Black as hes known around here is just massive in every way, big framed, super long spined, real wide based and just has that herdsire look to him. He does have a larger birthweight but I can honestly tell you he was the fastest born calf in the entire 2019 calving season. He was just dam near as long when he came out as he is now and we know that adds weight, just look at his weaning weight. It was very obvious this fall that you really make a lot more money on your calves the heavier they are. Its pretty evident this guy will add pounds to your calf crop. His dams passed 3 sons have all weaned over 1000lbs, talk about production. All this factors into our decision to retain the spring breeding rights on this beast of a bull for the use in our commercial cow herd. Hes just to good not to utilize in our own herd. He is unregistered right now but we are working to see if we can register him. We will have more info by the sale. We will be selling the summer breeding rights. We will walk him until June 1 and then he will be available to the new owner.

This years heavy weight of then pen! He really crushed the scale down to 1035lbs mid September. This marks the second year in a row that 62A has raised the heaviest weaning bull in the pen, last years full brother sold to Warkentin Bros where he has turned into a very impressive herdsire. Consistency is in the blood on this mating. The depth of rib on this Missile son is pretty impressive. This is a true beef bull, that will definitely add some muscle expression and shape to his calves. The Surge 38X cows we have are sure big time producers that will consistently wean the heaviest calves and we feel his dam 62A is one of the very best.

The MRL Missile progeny here have sure been the right kind consistently year after year. Missile is the type of bull to add some rib shape and improve foot structure. 443G comes with a little added frame then most Missile calves. His dam was purchased from the Twin Brae dispersal in Manitoba and has shown to be a super solid footed excellent uddered cow that can really raise a calf. Her Lotto daughter just calved a few days ago as I write this and man is she one of our favorites in an impressive group of Lottos.

Maybe a bit on the smaller side when it comes to frame but he maybe the stoutest bull in the pen besides that. He is just about as wide as he is tall and the definition of a tank. We purchased his dam out of Checkers from Jodi Hampton and its proving to be a very smart buy. Her bull last year went to Dale Martinson in High Prairie. She is a beautiful black blaze faced cow with an ideal udder structure and can milk like crazy for a small udder. Its hard not to like this bull.

Terms & Conditions

The terms of the sale are cash or cheque payable at par at sale location unless satisfactory credit arrangements have been made prior to the sale. The right of property shall not pass until after settlement is made. Bouchard Livestock Ltd reserves the right to require a certified cheque as settlement before releasing the sale cattle. Should the purchaser fail to settle for their purchase, Bouchard Livestock Ltd reserves full power to resell the animal to the best advantage, either publicly or privately, without further notice. Any loss arising from such resale, together with keep and all other expenses shall be payable by the defaulter. All settlements must be made with the clerks of the sale before any cattle will be released. The owners, Bouchard Livestock Ltd and sale staff have the right to refuse bids from anyone who has a previous record of default in payment and/ or who has not made prior credit arrangements prior to the sale with the owners and/ or Sales Management.

BID

Every animal consigned to the sale must be sold by auction. No by-bidding will be permitted. Each animal will be sold to the highest bidder.

DISPUTES

In cases of disputes, bidding will be reopened between the parties involved. If no further bid is made, the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision in such matters will be final.

PURCHASER'S RISK

Each animal becomes the risk of the purchaser as soon as sold.

ANNOUNCEMENTS

Announcements from the auction block will take precedence over printed matter in the catalogue. Buyers are therefore cautioned to pay attention to any such announcements.

CERTIFICATE OF REGISTRY

The proper Registration or Recordation paper, as the case may be, will be duly transferred and furnished to each buyer for each animal after settlement has been made.

SHIPPING

Assistance will be given in making shipment after the sale, but Sale Management or Seller assumes no risk. Expenses incurred after the responsibility of the purchaser. Purchasers are requested to furnish shipping instruction when making settlement.

GUARANTEE

All animals will carry standard breeding guarantee as specified by the applicable Canadian Beef Association. At no time shall the seller's liability exceed the purchased price of the animal.

EXCEPTION TO GUARANTEE

In cases where the animal is subjected to any hormonal or surgical reproduction techniques after the sale, the guarantee shall be null and void. In the cases of bulls, they are guaranteed to breed naturally according to applicable Canadian Breed Association guarantees, but no guarantee is given that semen from any bull will freeze.

HEALTH

It is the buyer's responsibility to determine health requirements for importing any animal into this province or state. Bouchard Livestock Ltd assumes no responsibility for the health status of any animal in the sale.

ACCIDENTS

Although every precaution will be taken to protect the safety and comfort of buyers, neither the Sale Management, auctioneer, or Association assumes any responsibility in this matter and disclaims any liability legal or otherwise in the event of accident or loss of property.

RIGHTS & OBLIGATIONS

The above terms and conditions of the sale shall constitute a contract between the buyer and the seller and be equally binding to both. Resale of animals following the purchase in this sale shall constitute a separate transaction and the rights and the terms and conditions of the sale do not cover obligations of the two parties connected thereto.

BOUCHARD LIVESTOCK LTD IS AGENT ONLY

It is clearly understood that Bouchard Livestock Ltd acts only as agent between buyer and seller and is not in any way responsible for any failure by either party to live up to his or her obligations to collect or enforce collection of monies by either parties, and in exceptional case, any legal action will be between buyer and seller. Bouchard Livestock Ltd has no ownership of the facility and assumes no responsibility for the operation of said facility.
